

International Webinar Series:

“Biologics: The Future of Therapeutics & Healthcare Management”

Duration- 6th – 9th Jun 2020

The term ‘biologics’ encompasses the entire range of substances and compounds that have a ‘biological’ origin. These include monoclonal antibodies, therapeutic proteins and peptides, and even whole organisms such as viruses and T cells. Their diversity is highlighted in their versatility; biologics have opened up possibilities for new and novel ways to treat diseases. Biologic therapies present the potential for more targeted, more effective and more personalized medicines.

SCES’s Indira college of Pharmacy organized an international webinar which was graced by eminent scientist who shared their views and works in Biologics. The webinar was attended by distinguished industry personnel, faculty members and students.

Esteemed Speakers:

Sr.No	Name of Speaker	Company name
1	Dr. Tejabhram Yedavalli	Post-doctoral fellow – Department of ophthalmology and visual sciences, University of Illinois, Chicago, USA
