**SUMMARY**

**LIST OF THE PUBLICATIONS BY FACULTY DURING THE LAST FIVE YEARS**

3.3.1 Number of research papers published per teacher in the Journals notified on UGC website during the last five years.

<b>2017-18</b>				
Sr.No.	Title of paper	Name of author's	Name of Journal	Indexing
1.	Antidiabetic and Hypolipidemic Potential of Hydroalcoholic Extract of <i>Canna Indica</i> L. Root and Rhizome in Rat.	Dr. Anagha Joshi / Dr. Subhash T. Kumbhar/ Shrinwas P. Patil	European Journal of Pharmaceutical and Medical Research	Index Copernicus
2.	Antioxidant, antibacterial and cytotoxic potential of silver nanoparticles synthesized using terpenes rich extract of <i>Lantana camara</i> L. leaves	Dr. Subhash T. Kumbhar / Shrinwas P. Patil	Biochemistry and Biophysics Reports	Web of science, Scopus, Google Scholar
3.	Central composite design to enhance the solubility of celecoxib	Pawar Yogesh D.	European Journal of Pharmaceutical and Medical Research	Index Copernicus
4.	Development and optimization of chitosan-ca-pectinate beads of amorphous celecoxib by response surface methodology.	Pawar Yogesh D.	International Journal of Pharmaceutical Sciences and Research	Index Copernicus, Scopus
5.	A design of experiment approach for optimization and characterization of Etodolac Ternary system using spray drying.	Shaikh Amir A.	International Journal of Pharmacy and Pharmaceutical Sciences	Index Copernicus, Scopus
6.	Central composite design for enhancement of Etodolac solubility via inclusion complexation PVP K-30 and hydroxypropyl $\beta$ -cyclodextrin.	Shaikh Amir A.	European journal of pharmaceutical and medical research	Index Copernicus
7.	Protective effect of standardized extract of <i>Passiflora incarnata</i> flower in Parkinson's and Alzheimer's disease.	Suvarna P. Ingale	Ancient Science of Life	Web of Science, Index Copernicus

**ABSTRACT**  
 One of the major challenges in pharmaceutical development is the poor dissolution performance of drugs. Celecoxib (CLX) is a poorly water soluble drug with its bioavailability being limited by its poor dissolution. In this study solvent evaporation method by rota evaporator was employed to prepare solid dispersion drug and polymers. Central composite design employed statistical experimental design tool and investigated the combined effect of

**ABSTRACT:** The aim of the present work was to develop a new microbeads system for colon-targeted delivery of celecoxib. The ternary system were develop using PVP (polyvinylpyrrolidone) and hydroxypropyl-β-cyclodextrin (HPβCD) to increase solubility of celecoxib. DSC and XRD results confirmed formation of amorphous celecoxib complex with HPβCD. Chitosan and pectin were used for the development of microbeads of new amorphous celecoxib. Calcium chloride was use as cross linking agent for electrolytic complexation between polymers. Ludox® RS100 was used to embed into microbeads in order to avoid premature delivery of a drug in acidic environment of stomach. Statistical design of experiment was employed to investigate the combined effect of these formulation variables, i.e., % of chitosan, pectin, and CaCl<sub>2</sub> on responses like drug release pattern in acidic dissolution medium (CDR in UGIT), colonic dissolution medium with fungus culture of *Aspergillus niger* (CDR in GIT) and drug entrapment efficiency (EE%). Response surface methodology was used to analyze multivariate approach for understanding the multifactorial relationships among formulation parameters. Full central composite design was employed to define a design space. Feasibility was used to attain simultaneous optimization of responses. Optimized formulation were evaluated and it was then found that obtained experimental values very close to predicted values. Ludox® RS 100 was successfully embedded in microbeads because there was negligible drug loss in acidic environment and maximum drug was released in colonic medium.

**INTRODUCTION:** Celecoxib (CLX), a Recently, CLX was frequently investigated for its fluorinated benzene sulfonamide derivative, is a anticancer activity using in vitro and in

7. In vitro evaluation of anthelmintic activity of juice of Euphorbia ligularia Roxb  
 Author: Suvarna P. Ingale

The screenshot shows a research paper on the OpenAIRE platform. The title is "IN VITRO EVALUATION OF ANTHELMINTIC ACTIVITY OF JUICE OF EUPHORBIA LIGULARIA ROXB." by Akshay M. Babhai, Zehra S. Baheti, Suvarna Ingale, Chinmay Deshmukh, Manish S. Wani. The abstract states: "The aim of present study was to evaluate anthelmintic potential of the juice of Euphorbia ligularia using Pterodroma (Pteronotus) leucogaster as test animal. Various concentrations (10, 20, 40, 60, 80, 100 mg/ml) of juice were tested in the presence of 0.1% of powdered seaweed extract (Eucheuma striatum) as control. The results of present study indicated that juice significantly demonstrated parasitic and acausal death of worms especially at higher concentration of 100 mg/ml as compared to standard reference fiberoxime (control). In conclusion the E. ligularia juice as an anthelmintic have been confirmed." The paper is published in the Indo American Journal of Pharmaceutical Research, Volume 16, Issue 12, December 2018.

8. Phytochemical analysis of Canna indica L. roots and rhizomes extract  
 Author: Dr. Subhash T. Kumbhar/ Shrinwas P.Patil

The screenshot shows a research paper on ScienceDirect. The title is "Phytochemical analysis of Canna indica L. roots and rhizomes extract" by Subhash T. Kumbhar, Shrinwas P. Patil, P. B. M. Hemanth, Q. Umer. The abstract states: "The aim of present study was to evaluate anthelmintic potential of the juice of Euphorbia ligularia using Pterodroma (Pteronotus) leucogaster as test animal. Various concentrations (10, 20, 40, 60, 80, 100 mg/ml) of juice were tested in the presence of 0.1% of powdered seaweed extract (Eucheuma striatum) as control. The results of present study indicated that juice significantly demonstrated parasitic and acausal death of worms especially at higher concentration of 100 mg/ml as compared to standard reference fiberoxime (control). In conclusion the E. ligularia juice as an anthelmintic have been confirmed." The paper is published in Biochemistry and Biophysics Reports, Volume 16, December 2018, Pages 50-53.

Author: Shrinivas P. Patil

European Journal of Pharmaceutical and Medical Research (EJPMR), 2020, 7(11), 145-152. SJIF Impact Factor 6.222. Research Article, ISSN 2394-3211. Author: Prasad S. Kshirsagar\* and Shrinivas P. Patil. SCES's Indira College of Pharmacy, Tathawade, 411033, Pune, India. Abstract: *Cosmos sulphureus* is ornamental plant. Present study was carried out for evaluation of ethanolic extract of its petals acts as pH indicator. Material & Methods: The previously dried and powdered flower petals of *C.Sulphureus* was extracted with 0.5% Acetic acid in ethanol then extract was studied preliminary for phytochemicals present and added to of buffer of different pH to note in change in colour. Result & Conclusion: on phytochemical screening pH sensitive anthocyanins which is present in extract used as pH indicator. Keywords: *Cosmos sulphureus*, Ethanolic extract, Anthocyanins, pH indicator.

14. Formulation and evaluation of ointment containing Turmeric oil.

Author: Shrinivas P. Patil

European Journal of Pharmaceutical and Medical Research (EJPMR), 2020, 7(12), 511-513. SJIF Impact Factor 6.222. Review Article, ISSN 2394-3211. Author: \*Himani More and Shrinivas P. Patil. SCES's Indira College of Pharmacy, Pune-411033, India. Abstract: Since long back, topical formulations are used to treat inflammation and infection, using turmeric. These formulations could be traditional or modern ones. Looking at importance of turmeric oil as anti-microbial agent and different chemical constituents present in it, we formulated an ointment containing turmeric oil. Prior to use of its different properties. Keywords: *Curcuma longa*, curcuminoids, topical formulation, texture analysis. Introduction: is curcumin, a curcuminoid present in its rhizomes. Apart from...

**Synthesis and Characterization of Lipophilic Salts of Metformin to Improve Its Repurposing for Cancer Therapy**

Mohit K. Sagar, Yogesh Sutar, Prachi Umar Patel, Roopal Bhat, Sujata Mallick, Alyssa E. Maraca, Dana Lynn T. Kooma, Ingo Lange and April A. Carter

ACS Omega

Abstract

Epidemiological evidence has accentuated the repurposing of metformin hydrochloride for cancer treatment. However, the extreme hydrophilicity and poor permeability of metformin hydrochloride are responsible for its poor anticancer activity *in vitro* and *in vivo*. Here, we report the synthesis and characterization of several lipophilic metformin salts containing bulky anionic permeation

**Abstract**

Capsanthin, a brightly orange-red-coloured pigment responsible for the peculiar red colour of paprika fruits (*Capsicum annuum*), belongs to xanthophylls, a class of oxygen-containing carotenoids. The characteristic chemical structure of capsanthin containing a keto group in conjunction with a long chain of 11 conjugated dienes is responsible for its strong radical scavenging and singlet oxygen quenching ability.

## 19. Asian Journal of Pharmacy and Pharmacology

The screenshot shows the CiteFactor website for the Asian Journal of Pharmacy and Pharmacology. The page includes a navigation menu, a search bar, and a main content area with the following details:

- Categories:** Articles (209723), Journals (3309)
- News:**
  - Journal Impact Factor Report 2021 (Date: 14th February 2022)
  - Submit Journal for Impact Factor Evaluation (Date: 12th May 2020)
  - Submit Your Journal for Indexing (Date: 12th May 2020)
  - Journal Impact Factor Report 2020 (Date: 22nd April 2020)
  - Journal Impact Factor Report 2018 (Date: 24th November 2018)
- Asian Journal of Pharmacy and Pharmacology (AJPP):**
  - A bimonthly peer-reviewed journal publishing authentic quality research work and reviews that provides scientific knowledge to the all communities. It serves as a messenger for exchange of scientific information between human being and researchers. It provides a podium to the researchers and scientists in all over the world, for the spreading of knowledge in the field of Pharmacy and Pharmacology. Articles having newer findings and research concepts will be given more preference for acceptance. AJPP publishes the articles related to the following subjects: Pharmacology, Pharmacokinetics, Immunology, Clinical Pharmacy, Pharmaceutical Biotechnology, Pharmacology and Phytochemistry, Pharmaceutical Analysis, Pharmaceutical Microbiology, Pharmaceutical Chemistry, Biotechnology, Biochemistry, Regulatory Affairs, Pharmacovigilance, Quality Assurance and Quality Control, Cell biology and Molecular biology, Life Science, Food science and Technology.
  - URL: <http://ajpp.in>
  - Keywords: Pharmacology, Pharmaceutics, Immunology, Clinical Pharmacy, Pharmaceutical Biotechnology, Pharmacokinetics and Phytochemistry, Pharmaceutical Analysis, Pharmacokinetics, Microbiology, Pharmaceutical Chemistry, Bioinformatics, Biochemistry, Regulatory Affairs, Pharmacovigilance, Quality Assurance and Quality control, Cell biology and Molecular biology, Life Science, Food science and Technology.
  - ISSN: 2455-2674
  - E-ISSN: 2455-2674
  - Subject: Pharmacy and material medicine
  - Publisher: Pharmaceutical Research Information Group
  - Year: 2015

Journal description | Details | Scientific profile | Editorial office | Publisher | Metrics

Biotechnology Reports covers all aspects of biotechnology particularly those reports that are useful and informative and that will be of value to other researchers in related fields. Biotechnology Reports covers ground breaking science, but will also accept good science that can be of use to the biotechnology community. The journal maintains a high quality peer review where submissions are considered on the basis of scientific validity and technical quality. Acceptable paper types are research articles (short or full length), reviews, and book reviews.
